STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman. (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications. as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH-Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia: Bronchopneumonia ("Pneumonia," unqualified, is indefinite): Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere chopheumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS-Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

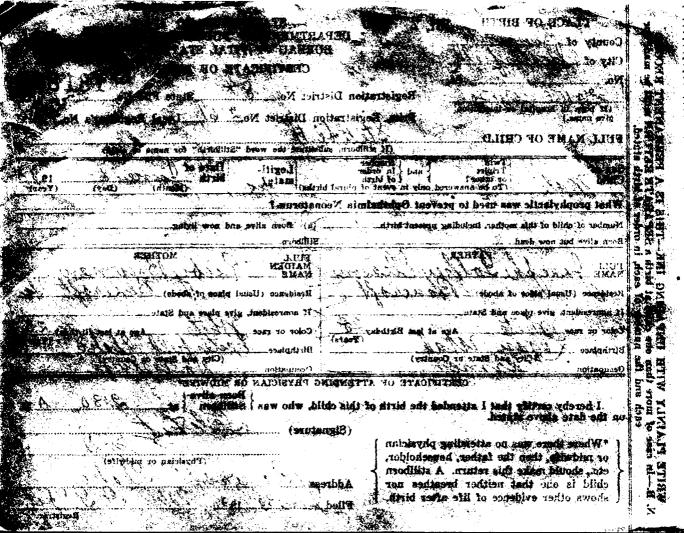

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION .- Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer," 'Foreman," "Manager," "Dealer, etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DIS-EASE CAUSING DEATH (the primary affection with respect to time and causation), using aways the same accepted

term for the same disease. Examples: Cerebro-spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report 'Typhoid Pneumonia'); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of \_\_\_\_\_ (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measies; Whooping cough; Chronic valvular heart disease; Chronic Interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.: Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," 'Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age." "Shock, "Uraemia." "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICID-AL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull, and consequences (e. g. sepsis. tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS —Mail all death certificates filed with you to the State Registrar on or before the fifth of the following month; after keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical state-

ment of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a mid-wife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer—Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia: Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.: Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inantion," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident: Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

|                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

STATEMENT OF OCCUPATION .-- Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient. e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive Engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Saleman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman." "Manager." "Dealer," etc, without more precise specifications, as Day laborer. Farm laborer, Laborer-Coal Mine etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At Home, and children not gainfully employed, as At school or At Home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH(the primary affection with respect to time and causation), using always the same ac-

cepted term for the same disease. Examples: Cerebro spinal fever (the only definite synonym is "Epidmic cerebrospinal meningitis"); Diptheria (avoid use of "croup"); Typhoid Fever (never report Typhoid pneumonia"): Lobar Pneumonia; Bronchopneumonia ("pneumonia," unqualified, is indefite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Sarcoma, etc., of ........................ (name origin); "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms: Measies: Whooping Cough: Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death). 29ds.; Bronchopneumonia (secondary). 10 ds. Never report mere symptoms or terminal conditions such as "Asthenia," "Anaemia" (merely symptomatic) "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old Age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL Septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull and consequences (e.g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of each death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile **Factory.** The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Stall," "The stall age," "The "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis." etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head—homicide: Poisoned by carbolic acid—probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was un-

dertaken. For VIOLENT DEATHS, state MEANS OF

INJURY and qualify as ACCIDENTAL, SUICIDAL, or

HOMICIDAL, or as probably such, if impossible to de-

termine definitely. Examples: Accidental drowning;

struck by railway train-accident; Revolver wound of

head-homicide; Poisoned by carbolic acid-probably sui-

cide. The nature of the injury, as fractured skull, and con-

sequences (e. g. sepsis, tetanus) may be stated under the

spinal fever (the only definite synonym is "Epidemic

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

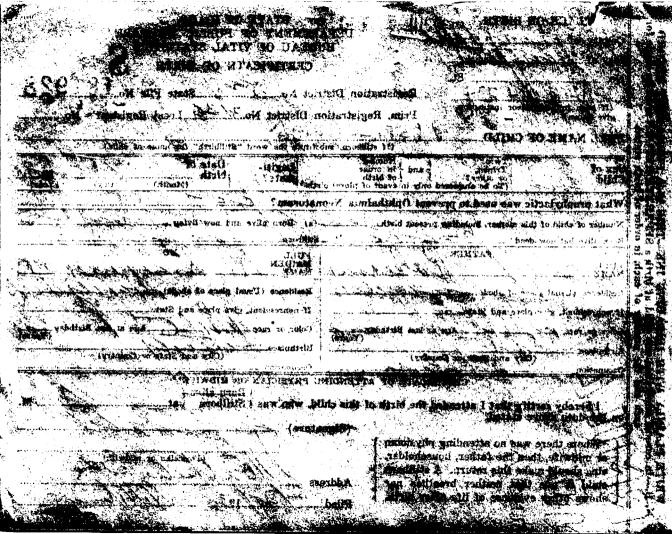

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

(State or Country) Place of Burial, Cremation, or Removal Date of Burial (Address) Address Registrar

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman." "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH-Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"): Lobar pneumonia: Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis. etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia." "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis." etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month: keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated

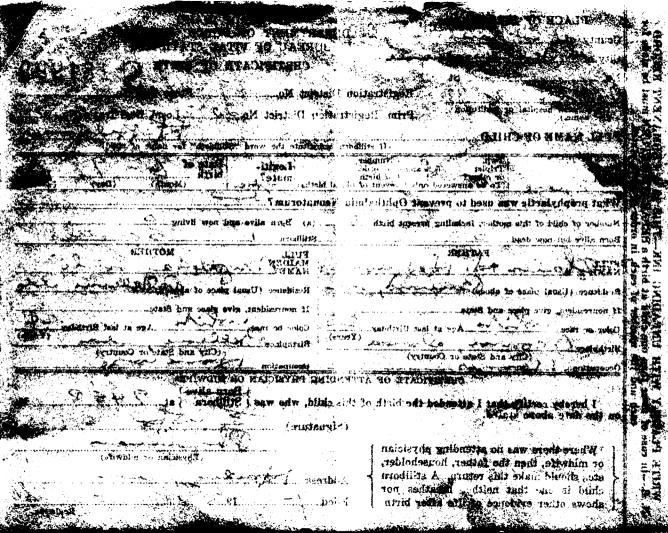

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

STATEMENT OF OCCUPATION .-- Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer. Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife. Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"): Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. use of "Tumor" for malignant neoplasms; Measles; Whooping cough: Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bron-chopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia." "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a

midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer. Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman." "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia." unqualified. is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of ...... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

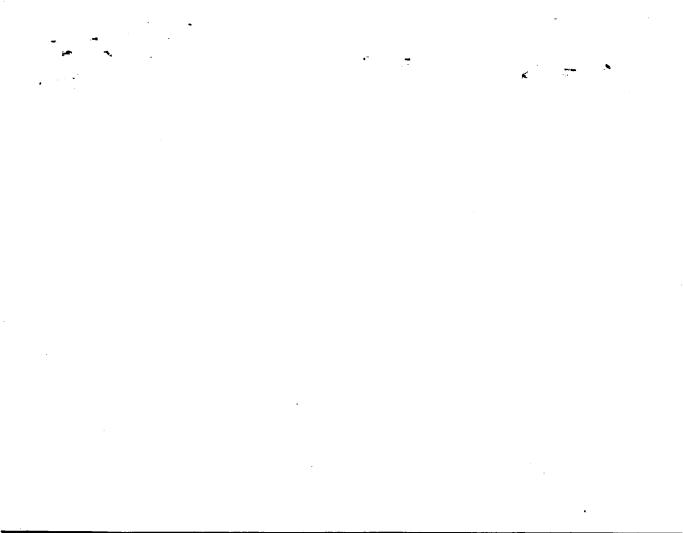

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

I

certificate should further state, if known, the cause of the still birth and the period of utero gestation in months.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient. e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement: it should be used only when needed. As examples: (a) Spinner. (b) Cotton Mill: (a) Salesman, (b) Grocery: (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer." 'Foreman," "Manager," "Dealer, etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None,

STATEMENT OF CAUSE OF DEATH-Name first the DIS-EASE CAUSING DEATH (the primary affection with respect to time and causation), using aways the same accepted

A stillbirth must be registered both as a birth and a death. The date of death should be the date of delivery and the death

term for the same disease. Examples: Cerebro-spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report 'Typhoid Pneumonia'); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, less definite: avoid use of "Tumor" for malignant neoplasms; Measles: Whooping cough: Chronic valvular heart disease: Chronic interstitial nephrltis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.: Bronchopneumonia (secondary), 10 ds. Never report more symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," 'Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy." "Exhaustion." "Heart Failure." "Hemorrhage." "Inanition," "Marasmus," "Old age." "Shock. "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia." "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICID-AL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS -Mail all death certificates filed with you to the State Registrar on or before the fifth of the following month; after keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical state-

ment of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a mid wife.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                     |                                              | ,                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | ~~~~                        |

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer. Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of Jungs, Whooping cough: Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere chopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Wakness," etc., when a definite disease can be ascertained as the cause. Always qualify a "PHERDERAL santiage" "SUIFERDERAL santiage". as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident: Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere chopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify of "PHERDERAL sentions," "PHERDERAL positions." as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

unawite.

BIRTHPLACE OF MOTHER (State or Country) Place of Burial, Cremation, or Removal Date of Burial Informant (Address) Address 20. Undertaker

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH-Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

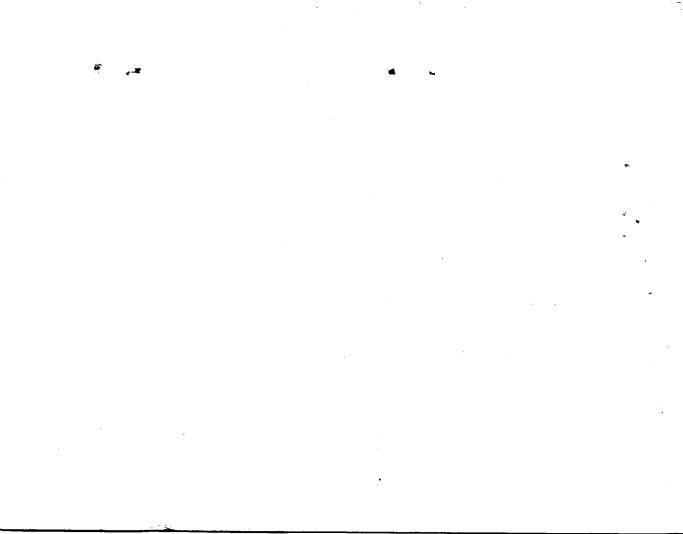

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

(Sign                                                                                                                                                  | aild, who was Stillborn at 6:40 M.                                                                                                                                                                                         |
|            | *Where there was no attending physician or midwife, then the father, householder, etc., should make this return. A stillborn child is one that neither breathes nor shows other evidence of life after birth.  *Address:  Address:  Filed: | ess Schron 19 3 o Regionar.                                                                                                                                                                                                |

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning:

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

struck by railway train-accident; Revolver wound of

head-homicide; Poisoned by carbolic acid-probably sui-

cide. The nature of the injury, as fractured skull, and con-

sequences (e. g. sepsis, tetanus) may be stated under the

Do not accept a certificate of death signed only by a midwife.

head of "Contributory."

BIRTHPLACE OF FATHER What test confirmed dearnosis? (State or Country) (Address) 12. MAIDEN NAME OF MOTH State the DISEASE CAUSING DEATH, or in deaths from VIOLEN CAUSES, state (1) MEANS AND NATURE OF INJURY, and (2) whether ACCIDENTAL, SUICIDAL, or HOMICIDAL. 18. BIRTHPLACE OF MOTHER /city (State or Country) 19. Place of Burial Cremation, or Removal Date of Burial Informant 19 (Address) 20. Undertaker Address

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere chopheumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PILERPERAL sention"," "PILERPERAL peritor as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

JUN 20 1930 DEPARTMENT OF PUBLIC WELFARE BUREAU OF VITAL STATISTICS CERTIFICATE OF BIRTH No. Registration District No. .....State File No..... (If born in hospital or institution Prim. Registration District No. 10 ToLocal Registrar's No. give name.) FULL NAME OF CHILD...... (If stillborn, substitute the word "Stillbirth" for name of shild) Number Date of h Legiti-Sex of Triplet in order mate? Child or other? (To be answered only in event of plural births) (Month) (Day) What prophylactic was used to prevent Ophthalmia Neonasorum? Number of child of this mother, including present birth...... UNDERTAKER ADDRESS                                                                                                                                                        |

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman. (b) Grocery: (a) Foreman. (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman." "Manager." "Dealer, etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name, first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same

accepted term for the same disease. Examples: Cerebrospinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"): Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia") Lobar pneumonia: Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of .....(name origin; "Cancer' is less definite; avoid use of "Tumor" for malignant neoplasms; Measles: Whooping cough: Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.: Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congental," "Senile." etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUER-PERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train -accident: Revolver wound of head-homicide: Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull, and consequences (e. g. sepsis. tetanus) may be stated under the head of "Contributory."

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease: Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.: Bronchopneumonia (secondary), 10 ds. Never report mere enopheumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Chook" "Uranmi," "Woolmage," etc., whom a definite "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childhith or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning:

spinal fever (the only definite synonym is "Epidemic

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

struck by railway train-accident; Revolver wound of

head-homicide; Poisoned by carbolic acid-probably sui-

cide. The nature of the injury, as fractured skull, and con-

sequences (e. g. sepsis, tetanus) may be stated under the

head of "Contributory."

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer." "Foreman." "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework. or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager." "Dealer," etc., without more precise specification, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: Farmer (retired, 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH.—Name, first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia") Lobar pneumonia; Bronchopneumonia ("Pneumonia." unqualified, is indefinite); Tuberculosis of lungs, use of "Tumor" for malignant neoplasms); Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Example: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy", "Collapse," "Coma," "Convulsions," "Debility, ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Haemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Unamic", "Woolsoog," as he is a left in the content of the c "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUER-PERAL, septicemia", "PUERPERAL peritonitis," etc... all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; Struck by railway train -accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fracture of skull, and consequences (e. g., sepsis, tetanus) may be stated under the head of "Contributory."

Filed Jan / , 1930 Sus an & Bruce Registrar                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | assar Morcus du Levelos da                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH. state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever, write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock" "Ureamia," "Woolpage," etc., "ott., when eld-finite. "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill; (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia." unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases, especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman, (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine, etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH-Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs, meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere "Anaemia" (merely symptomatic), "Atrophy," "Collapse,"
"Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure,"
"Hemorrhage," "Inanition," "Marasmus," "Old age,"
"Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis," etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning; struck by railway train-accident; Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS-Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

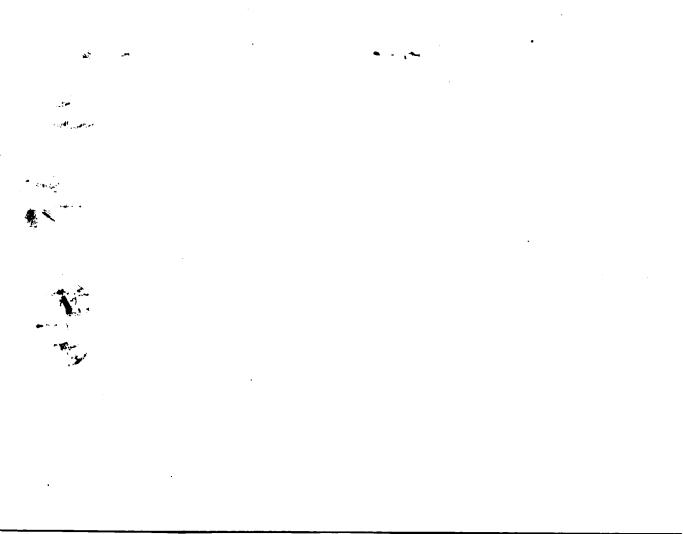

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.

Do not accept a certificate of death signed only by a midwife.

STATEMENT OF OCCUPATION.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., Farmer, Physician, Stenographer, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman, etc. But in many cases. especially in industrial employments, it is necessary to know (a) the kind of work and also (b) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (a) Spinner, (b) Cotton Mill: (a) Salesman. (b) Grocery; (a) Foreman, (b) Automobile Factory. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specifications, as Day laborer, Farm laborer, Laborer-Coal mine. etc. Women at home, who are engaged in the duties of the household only (not paid Housekeepers, who receive a definite salary), may be entered as Housewife, Housework, or At home, and children, not gainfully employed, as At school or At home. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business that fact may be indicated thus: Farmer (retired 6 yrs.) For persons who have no occupation whatever. write None.

STATEMENT OF CAUSE OF DEATH—Name first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: Cerebro-

spinal fever (the only definite synonym is "Epidemic cerebrospinal meningitis"); Diphtheria (avoid use of "Croup"); Typhoid fever (never report "Typhoid Pneumonia"); Lobar pneumonia; Bronchopneumonia ("Pneumonia," unqualified, is indefinite); Tuberculosis of lungs. meninges, peritoneum, etc., Carcinoma, Carcoma, etc., of (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms; Measles; Whooping cough: Chronic valvular heart disease; Chronic interstitial nephritis, etc. The contributory (secondary or intercurrent affection need not be stated unless important. Examples: Measles (disease causing death), 29 ds.; Bronchopneumonia (secondary), 10 ds. Never report mere chopheumonia (secondary), 10 us. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility," ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart Failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Chall" "Theorie" "Wolfers" of the property of the construction of th "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify as "PUERPERAL septicemia," "PUERPERAL peritonitis." etc. all diseases resulting from childbirth or miscarriage. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as probably such, if impossible to determine definitely. Examples: Accidental drowning: struck by railway train-accident: Revolver wound of head-homicide; Poisoned by carbolic acid-probably suicide. The nature of the injury, as fractured skull, and consequences (e. g. sepsis, tetanus) may be stated under the head of "Contributory."

DUTY OF LOCAL REGISTRARS—Mail all death certicates filed with you to the State Registrar on or before the fifth of the following month; keeping a copy of same for your local record.

Enter date of filing on the certificate immediately and give the certificate its registered number, beginning each year with number one. Carefully examine each certificate before issuing the burial permit and call the attention of the undertaker or other person to any omissions. If the information cannot be secured, it should be plainly stated unknown.

Registrars should be careful to see that the medical

statement of death is supplied. If no physician attended the deceased and it is probable that death was due to unlawful or suspicious means, the case should be referred to the Coroner for investigation and statement of the cause of death; other deaths than above without medical attendance should be referred to the Health Officer (if a physician), but when there is no such health officer, and only in such cases, the local registrar may make the return upon the information of relatives or friends of the deceased having adequate knowledge of the facts.
